

ENVIRONMENTAL POLICY

Tapì Spa, in full compliance with the laws, is committed to carrying out its activities responsibly in order to, at any time, guarantee environmental and workers safety and to ensure that any negative effects on the environment or safety is eliminated or reduced to the minimum technically and economically achievable levels.

Tapì Spa considers the protection of the environment as essential for the quality of life and for sustainable development.

GENERAL OBJECTIVES

In order to do this, the company undertakes to:

- Maintain the full legislative compliance with reference to legal and other requirements
- Adopt active policies to prevent pollution and protect the environment and therefore reduce the negative impact of the company on the external environment
- Involve and sensitize all staff on environmental issues related to the company's activities.

The areas in which Tapì Spa is most involved are:

- Waste management
- Reduction of electricity, gas and water consumption
- Impact of the finished product on the environment
- Communication of the environmental values

This Policy is oriented towards the prevention (in particular of every type of pollution) and represents the guide for the continuous improvement of environmental performances; it also constitutes the frame of reference for the definition and review of environmental objectives by each production site.

The Management is committed to implementing the principles of the Environmental Policy and the objectives that derive from it and for this reason it provides the necessary structure and resources; it also periodically monitors the achievement of objectives and, if necessary, promotes appropriate corrective or improvement actions.
